25X1

SUBJECT : The Flanigan Project

Mr. Walsh has established the following guidelines in response to questions that have been raised about the production of the Directorate's support for the projected trade negotiations:

A. In effect, local option rules will apply. It will be up to the originating office to decide which reports will be restricted to CIEP only and which will be handled as standard dissemination items. Each office will also decide on the format (typescript memos or DDI cover sheet) that is most appropriate for each report. Those reports dealing specifically with US trade negotiating positions cannot be given standard dissemination without the approval of Mr. Peter Flanigan.

B. There is no need for a statement in the reports on whether coordination has been achieved with State/INR.
